Sir:

An interview has been scheduled for June 10, 2010 with Examiner Wieczorek.

Applicants' representative would like to discuss the following issues during the interview.

1. How the Examiner is combining the references. And particularly how switching the order of the steps in Sugino and Nishida would make Applicants' claimed invention.
2. The comparative data of Applicants' specification showing unexpected results and whether additional examples are needed.
3. The 112 rejections (briefly, if time permits).

Respectfully submitted,
